For Username; do we keep a limit? What if someone has a long username. Impose restrictions. ← Has to be real name!

← all stored in instance variables

private final static String Username = new String " "
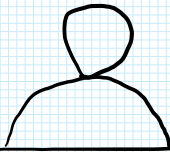

Need a limit for password length too.

User Name:
Password:
Uoft email:
Bio: ← few sentences about user;
Courses: — Drop down box;

Have a limit to the number of sentences

Should we have a drop down? Options are endless then. "Use Uoft login API"!

Program: — Drop down box;

Availability:

Utilizes Slotify API

After registering; their profile should look like this –

Name :- Julia Paschek
Email : Julia.posheck@ .
Bio : "I want to pursve······
·········· ".
Courses : CSC207, CSC236
Program : Computer Science
Availabiltry :-

How to depict this? Separate View? Think about how to depict this !!
